

How to join the cPRO ICO?

Simple step-by-step guide to participating the cPRO ICO.

Step 1: Obtain Ether

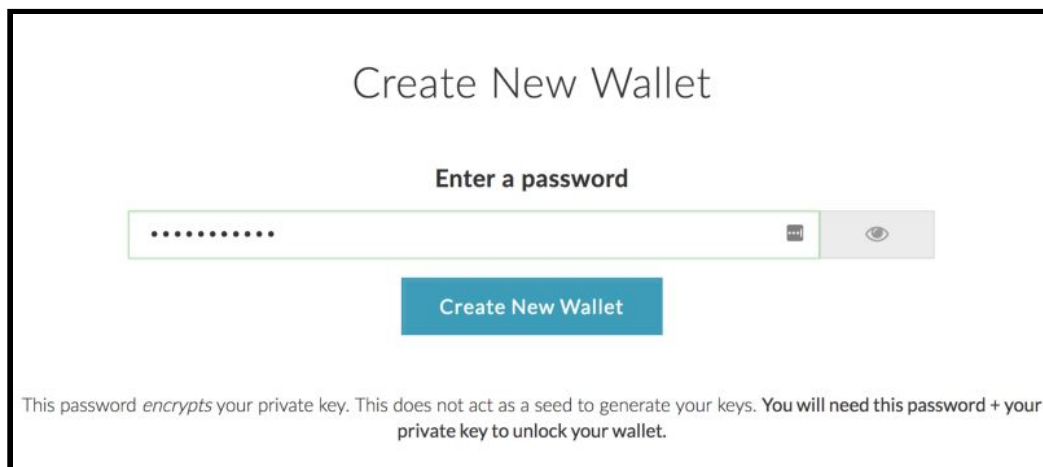

So the first step is to obtain ether cryptocurrency. You can purchase Ether through online exchanges such as [Coinbase](#) or [Bitstamp](#) (or some other exchange). Register an account with the exchange, and then transfer money (also known as fiat currency) from your bank account to your account on the exchange.

With your fiat currency, you can now purchase Ether cryptocurrency on the exchange that you are registered with. Ethers that you have purchased will be sent to an online wallet provided by the exchange.

Step 2: Create a Ethereum Wallet

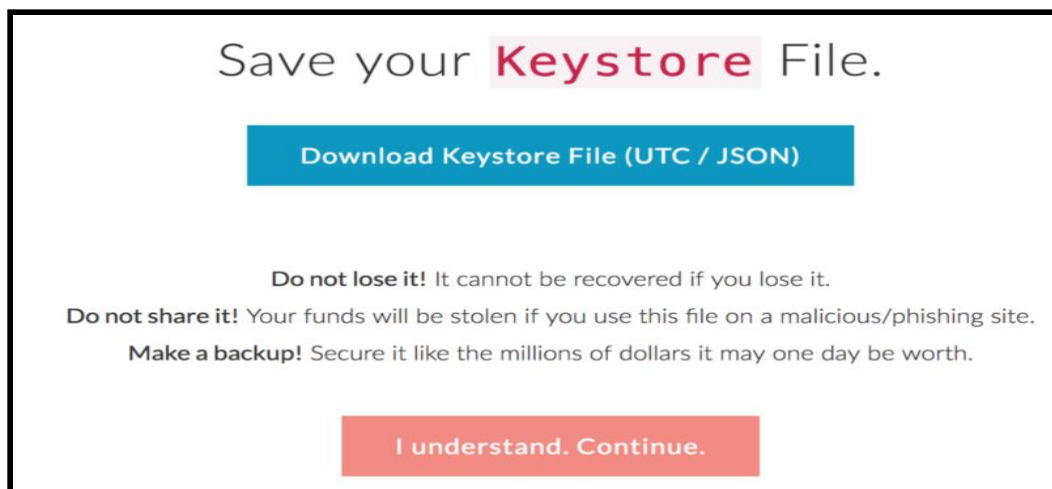

Next, you will need a crypto-wallet that you have control over to send and receive coins from exchanges and the ICO. After you have obtained Ether cryptocurrency using your fiat, transfer your cryptocurrency from your exchange wallet, to your secure user-controlled wallet such as [Metamask](#) or [MyEtherWallet](#).

Visit www.myetherwallet.com. The first thing you see is:

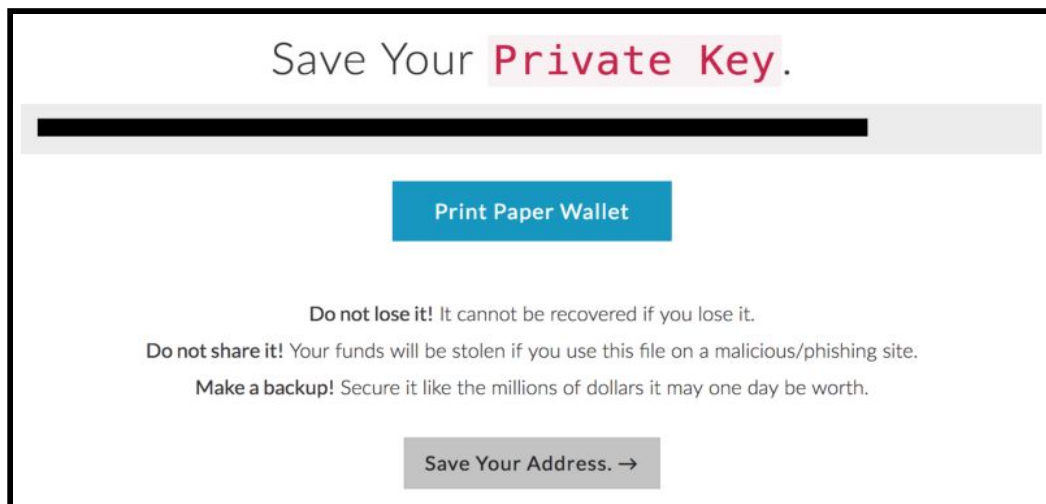

The screenshot shows a web form titled "Create New Wallet". Below the title is the instruction "Enter a password". There is a text input field containing several dots, indicating a masked password. To the right of the input field are two small icons: a key icon and an eye icon. Below the input field is a blue button labeled "Create New Wallet". At the bottom of the form, there is a disclaimer: "This password *encrypts* your private key. This does not act as a seed to generate your keys. You will need this password + your private key to unlock your wallet."

Fill in the form, make sure to remember password, and then press 'Create New Wallet'!

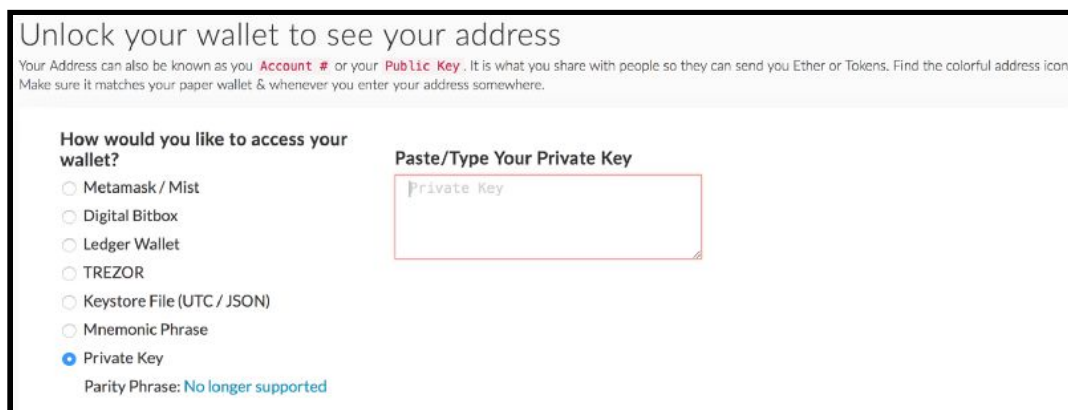

The screenshot shows a screen titled "Save your Keystore File.". Below the title is a blue button labeled "Download Keystore File (UTC / JSON)". Below the button, there are three lines of text: "Do not lose it! It cannot be recovered if you lose it.", "Do not share it! Your funds will be stolen if you use this file on a malicious/phishing site.", and "Make a backup! Secure it like the millions of dollars it may one day be worth.". At the bottom of the screen is a red button labeled "I understand. Continue."

Now, save your Keystore File!

Make sure you write down or print your Private Key in order to create a Paper Wallet. Remember, there's no way to remind you of your password or Private Key, the technology simply doesn't allow that! If it's lost, it's lost forever!

There are various types of wallets catering to different types of users and their needs. These include Desktop/Mobile Wallets, Online Wallets, Hardware Wallets and Paper Wallets. Refer to this [link](#) for a more detailed description.

***NOTE: If you send Ether from your Coinbase (or any other online exchange) account to a cPRO ICO address, you will NOT receive cPRO tokens, they will end up on the exchange instead. It is also inadvisable to keep your cryptocurrencies stored in online exchange wallets, as they are vulnerable to hacking!**

Step 3: Join the cPRO ICO!

Now that you are armed with the Ether cryptocurrency in your personal crypto-wallet, you are ready to dive into the cPRO ICO.

All that is left is to send your Ethers to the cPRO ICO address to receive cPRO tokens:
